EASEMENT

THIS INDENTURE made this 27th day of May, 2004 by Robert E. Blanford and Georgia K. Blanford, husband and wife, the undersigned owner or owners of Lot 92 in Millard Park South, a subdivision as surveyed, platted and recorded in Sarpy County, Nebraska (herein the "Grantor(s)") and Sanitary and Improvement District No. 216 of Sarpy County, Nebraska (herein the "Grantee"),

NOW, THEREFORE, in consideration of One Dollar (\$1.00) and other valuable consideration, the receipt of which is hereby acknowledged, Grantor(s) and Grantee agree as follows:

1. Grant of Easement. The Grantor(s) hereby grant a permanent easement on the rear ten (10) feet of Lot 92 in Millard Park South, to the Grantee and its successors and assigns (said Lot referred to herein as "Grantor(s)'s Lot"). Attached hereto as Exhibit "A" and incorporated herein by reference is a drawing which shows said Easement.

2. Purpose of Easement. The purpose of this Easement is to construct, operate, maintain, repair and/or replace storm sewers, drainage ways, drainage devices, and other types of surface water drainage on the Grantor(s)'s Lot described in this Easement.

3. Grantee To Install Certain Drainage Improvements. Subject to all of the conditions outlined herein, the Grantee agrees to cause its contractor to construct certain drainage improvements on the Easement granted herein in accordance with the plans and specifications prepared by the engineers of the Grantee.

4. Term of Easement. The term of this Easement shall be forever.

5. Prohibition Against Interference With The Easement. This Easement is being granted to allow for construction and maintenance of a storm sewer and drainage swale within the easement area as an accommodation to the Grantor(s) in an attempt to solve the surface water drainage problem on the Grantor(s)'s Lot. If any type of building, structure, landscaping or any other obstacle is placed on the Easement, it may affect the surface water drainage on the Grantor(s)'s Lot. Therefore, the Grantor(s) hereby covenants that upon completion of the drainage swale and storm drainage system the Grantor(s) will not do any grading nor place nor construct on the Easement granted herein any building, structure, landscaping, or any other type of obstacle which obstructs surface water drainage on the Easement granted herein. The Grantor(s) also covenants that the Grantor(s), at the Grantor(s)'s sole expense, will keep the storm sewers, drainage ways, drainage devices, and other types of surface water drainage on the Easement on his ("his" to include "her", "their" or "its") Lot in good repair and condition.

6. Condition of Acquiring Easements. In the event the Grantee is unable to secure an easement in a form acceptable to the Grantee from one or more of the Lot owners owning Lots west or south of Grantor(s)'s Lot, the Grantee, in its sole and absolute discretion, can decline to install a storm sewer line on this Easement.

7. Circumstances Where This Easement Is Void. In the event no work is done on the Easement granted on the Lot described herein for the reason outlined in Paragraph 6, above or within one (1) year of the date of full execution of this easement, the Easement granted herein shall be null and void. But if the work is done, this Easement shall be for the term outlined in Paragraph 4, above.

8. Grantor(s)'s Authority. The Grantor(s), for himself and his successors and assigns, do hereby covenant and agree with the Grantee, and its successors and assigns, that the Grantor(s) at the time of execution of this Easement has the good, right and lawful authority to grant this Easement, and that the Grantor(s), and his successors and assigns, further covenant to warrant and defend said Easement against the lawful claims of all persons whomsoever.

9. Binding Effect. This Easement, and all of its terms and conditions, shall be binding upon, and shall benefit the Grantor(s) and his successors and assigns, and the Grantee, and its successors and assigns.

B

Dated this 27 day of May, 2004.

to be the Chairman and identical whose name is affixed to the foregoing instrument and who
acknowledged his execution thereof to be his voluntary act and deed as such District.

Kristy J. Gregath
Notary Public

C

Addendum To Easement

THIS ADDENDUM shall be attached to an Easement to Sanitary and Improvement District No. 216 of Sarpy County, Nebraska (the "Grantee") on Lot 92 in Millard Park South, a subdivision as surveyed, platted and recorded in Sarpy County, Nebraska, and shall become a part of said Easement.

1. Description of Grading. When the subdivision was originally graded, there was a grading plan which provided surface water drainage along the rear lot lines of this lot and the Other Benefiting Lots. In conjunction with the construction of the drainage improvements the grade on the rear five (5') feet of this lot and the Other Benefiting Lots will be re-established to the grade shown on the original grading plan. The remaining five feet of the easement on the Grantor's Lot will be graded as a transition to the existing grade of the balance of the Grantor's Lot. *Grading will slope from East to West along lot line to provide drainage to inlet.*

2. Fences. The Grantee will remove any fence on the easement which will interfere with the required grading and the construction of the storm sewer system. After the grading and the construction of the storm sewer drainage system is completed, the Grantee will re-erect the fence at or near its original location but at the new elevation.

3. Re-Sodding. Following the completion of the grading and storm sewer construction, the Grantee will replace sod in the construction area when weather permits.

4. Trees and Shrubs. If it is necessary to remove any trees or shrubs, which are located in the easement area, the Grantee will remove the trees and shrubs and replant them in the same approximate location following the completion of construction and grading. Provided, however, the Grantee will not guarantee the survival of any replanted trees or shrubs.

5. Underground Watering Systems. Provided Grantor will provide information about the location of any underground water system, the Grantee will repair any damage done to the underground water system during grading and construction of the storm sewer drainage system.

6. Sole Cost of Grantee. All of the work outlined in this Addendum will be done at the sole cost of the Grantee.

7. Practicable Exception. As outlined in the easement to which this Addendum is attached, the work described above and in the easement document is being done as an accommodation to the Grantor at the sole cost of the Grantee. Therefore, the provisions of this Addendum are subject to what is practical as determined by the Grantee.

Dated the same day as this Easement.
